Pre-University Paper from the year 2020 in the subject Didactics - English - Miscellaneous, grade: 14, , language: English, abstract: Many children dream of being astronauts and traveling to space. Many hopeless romantics look at the sky in the evening, count the stars and think about how beautiful the moon and sun is. But does anyone ever wonder what's happening up there? Or what are the conditions like? How did the children start dreaming of such thoughts? What are the reasons why humanity started discovering space? And does it have any advantages for us? Or is it just a political game between two great powers? In my research work I am going to try to answer these questions. After World War II, it did not take long for a new conflict to begin, which occurred between the world's two greatest powers. The democratic, capitalist United States and the communist Soviet Union. The battle was known as The Cold War (1947-1991). Neither country fought directly in an open fight. They used many different places to demonstrate their great power, to show their opponent what kind of weapons they have. Starting with the Berlin Blockade (1948-1949), the Vietnam War (1956-1975) and The Cuban Missile Crisis 1962, until the last crisis occurred during the 1983 NATO exercise. The conflict did not just remain on Earth. In the late 1950s, Space was a new dramatic theater in the Cold War for this Power showing off race. Both countries tried to overcome the achievements of the other, which was called the Space Race. At the beginning I will explain how this cooption started and what the reasons were. The leadership was for the Russians, so they were more successful in the beginning, therefore I will write about the achievements they had before the United States joined this race. But the United States wasn't

satisfied with being behind in the "game", so they decided to set up NASA space exploration and they challenged themselves with one of the biggest projects that had great success in the late 1960s and these are my fourth and fifth points that I want to discuss. Thereafter I will investigate whether there was a winner in the end or not. Lastly, I will show the benefits of these races, because thanks to it, there are many new useful inventions and developments that have made our lives easier.

Gargantua and Pantagruel by Francois Rabelais, was first published in the mid sixteenth century. A work of satirical and fantasy fiction, it tells the story, over 5 books, of two giants; Gargantua and his son Pantagruel as they travel through various lands. On their travels, they meet people on Tool Island, who are so fat, they slit their skin to let the fat puff out; the sexually prolific Semiquavers; the Furred Law-Cats, who imprison them; and, the Chitterlings, who attack them. Containing much vulgarity and wordplay, it was viewed as obscene by some, and treated with suspicion during a social age of religious oppression.

International phenomenon Angie Thomas revisits Garden Heights seventeen years before the events of The Hate U Give in this searing and poignant exploration of Black boyhood and manhood. A Printz Honor Book! If there's one thing seventeen-year-old Maverick Carter knows, it's that a real man takes care of his family. As the son of a former gang legend, Mav does that the only way he knows how: dealing for the King Lords. With this money he can help his mom, who works two jobs while his dad's in prison. Life's not perfect, but with a fly girlfriend and a cousin who always has his back, Mav's got everything under control. Until, that is, Maverick finds out he's a father. Suddenly he has a baby, Seven, who depends on him for everything. But it's not so easy to sling dope, finish school, and raise a child. So when he's offered the chance to go straight, he takes it. In a world where he's expected to amount to nothing, maybe Mav can prove he's different. When King Lord blood runs through your veins, though, you can't just walk away. Loyalty, revenge, and responsibility threaten to tear Mav apart, especially after the brutal murder of a loved one. He'll have to figure out for himself what it really means to be a man.

A stunning novel, spanning generations and continents, *Ghana Must Go* by rising star Taiye Selasi is a tale of family drama and forgiveness, for fans of Zadie Smith and Chimamanda Ngozi Adichie. This is the story of a family -- of the simple, devastating ways in which families tear themselves apart, and of the incredible lengths to which a family will go to put itself back together. It is the story of one family, the Sais, whose good life crumbles in an evening; a Ghanaian father, Kweku Sai, who becomes a highly respected surgeon in the US only to be disillusioned by a grotesque injustice; his Nigerian wife, Fola, the beautiful homemaker abandoned in his wake; their eldest son, Olu, determined to reconstruct the life his father should have had; their twins, seductive Taiwo and acclaimed artist Kehinde, both brilliant but scarred and flailing; their youngest, Sadie, jealously in love with her celebrity best friend. All of them sent reeling on their disparate paths into the world. Until, one day, tragedy spins the Sais in a new direction. This is the story of a family: torn apart by lies, reunited by grief. A family absolved, ultimately, by that bitter but most tenuous bond: familial love. *Ghana Must Go* interweaves the stories of the Sais in a rich and moving drama of separation and reunion, spanning generations and cultures from West Africa to New England, London, New York and back again. It is a debut novel of blazing originality and startling power by a writer of extraordinary gifts. 'Ghana Must Go' is both a fast moving story of one family's fortunes and an ecstatic exploration of the inner lives of its members. With her perfectly-pitched prose and flawless technique, Selasi does more than merely renew our sense of the African novel: she renews our sense of the novel, period. An astonishing debut! Teju Cole, author of *Open City* Taiye Selasi was born in London and raised in Massachusetts. She holds a B.A. in American Studies from Yale and an M.Phil. in International Relations from Oxford. "The Sex Lives of African Girls" (Granta, 2011), Selasi's fiction debut, appears in *Best American Short Stories 2012*. She lives in Rome.

The "beautiful and haunting" (San Francisco Chronicle) tale of an orphan's search for love, for his unknown father, and for the key to the elusive riddle of his fate, from the author of the forthcoming *4 3 2 1: A Novel* Marco Stanley Fogg is an orphan, a child of the sixties, a quester tirelessly seeking the key to his past, the answers to the ultimate riddle of his fate. As Marco journeys from the canyons of Manhattan to the deserts of Utah, he encounters a gallery of characters and a series of events as rich and surprising as any in modern fiction. Beginning during the summer that men first walked on the moon, and moving backward and forward in time to span three generations, *Moon Palace* is propelled by coincidence and memory, and illuminated by marvelous flights of lyricism and wit. Here is the most entertaining and moving novel yet from an author well known for his breathtaking imagination. From New York Times-bestselling

author Paul Auster (*The New York Trilogy*).

"My name is Karim Amir, and I am an Englishman born and bred, almost..." The hero of Hanif Kureishi's debut novel is dreamy teenager Karim, desperate to escape suburban South London and experience the forbidden fruits which the 1970s seem to offer. When the unlikely opportunity of a life in the theatre announces itself, Karim starts to win the sort of attention he has been craving - albeit with some rude and raucous results. With the publication of *Buddha of Suburbia*, Hanif Kureishi landed into the literary landscape as a distinct new voice and a fearless taboo-breaking writer. The novel inspired a ground-breaking BBC series featuring a soundtrack by David Bowie.

The #1 New York Times Bestseller (October 2017) from the author of *The Da Vinci Code*. Robert Langdon, Harvard professor of symbology, arrives at the ultramodern Guggenheim Museum Bilbao to attend the unveiling of a discovery that "will change the face of science forever." The evening's host is Edmond Kirsch, a forty-year-old billionaire and futurist, and one of Langdon's first students. But the meticulously orchestrated evening suddenly erupts into chaos, and Kirsch's precious discovery teeters on the brink of being lost forever. Facing an imminent threat, Langdon is forced to flee. With him is Ambra Vidal, the elegant museum director who worked with Kirsch. They travel to Barcelona on a perilous quest to locate a cryptic password that will unlock Kirsch's secret. Navigating the dark corridors of hidden history and extreme religion, Langdon and Vidal must evade an enemy whose all-knowing power seems to emanate from Spain's Royal Palace. They uncover clues that ultimately bring them face-to-face with Kirsch's shocking discovery...and the breathtaking truth that has long eluded us.

The investor-owned corporation is the conventional form for structuring large-scale enterprise in market economies. But it is not the only one. Even in the United States, noncapitalist firms play a vital role in many sectors. Employee-owned firms have long been prominent in the service professions--law, accounting, investment banking, medicine--and are becoming increasingly important in other industries. The buyout of United Airlines by its employees is the most conspicuous recent instance. Farmer-owned produce cooperatives dominate the market for most basic agricultural commodities. Consumer-owned utilities provide electricity to one out of eight households. Key firms such as MasterCard, Associated Press, and Ace Hardware are service and supply cooperatives owned by local businesses. Occupant-owned condominiums and cooperatives are rapidly displacing investor-owned rental housing. Mutual companies owned by their policyholders sell half of all life insurance and one-quarter of all property and liability insurance. And nonprofit firms, which have no owners at all, account for 90 percent of all nongovernmental schools and colleges, two-thirds of all hospitals, half of all day-care centers, and one-quarter of all nursing homes. Henry Hansmann explores the reasons for this diverse pattern of ownership. He explains why different industries and different national economies exhibit different distributions of ownership forms. The key to the success of a particular form, he shows, depends on the balance between the costs of contracting in the market and the costs of ownership. And he examines how this

balance is affected by history and by the legal and regulatory framework within which firms are organized. With noncapitalist firms now playing an expanding role in the former socialist countries of Eastern Europe and Asia as well as in the developed market economies of the West, The Ownership of Enterprise will be an important book for business people, policymakers, and scholars.
